

Staying Connected for Conservation in a Changed World: UKOTCF's 6th conference on conservation and sustainability in UK Overseas Territories, Crown Dependencies and other small island states

By Zoom
2nd, 3rd, 9th & 10th March 2021

Access to video recordings of conference sessions

Registered conference participants have access to recordings of all conference sessions. UKOTCF has received several requests for access to these session recordings from persons who did not register for the conference.

UKOTCF Council has discussed this. Factors taken into account include:
the intention to spread information to conservation workers;

- making individual talks or sessions available would be impracticable for several reasons;
- the fact that all participation is subsidised by the work of UKOTCF and its volunteers;
- the principle that, the costs of the conference (beyond the contributions from sponsors, UKOTCF etc) should be shared between those benefiting, with some support to those of limited means;
- the contributions made by those who paid to participate in the conference should be respected.

Accordingly, Council decided that those who did not register in advance of the conference could register retrospectively for access to the session recordings at basically the same cost as those who participated, but with a 20% discount. This means that the basic rate is £80. A concessionary rate of £40 is available to members of UKOTCF member organisations, co-authors of talks (lead authors have already been provided with free registration) and students.

This is on condition that the material in the recordings is not used in any other way. This includes not using on social media unless the author has approved in writing and UKOTCF is credited and a link to its website (www.ukotcf.org.uk) included.

Applications for access to the recordings:
